May 20, 2003

To whom it may concern,

This letter is intended to serve as a strong letter of recommendation on behalf of Mr. Bradley C. Harbour, Safety Manager for AMEC Construction Management Inc.

As a member of the Massport Fire Rescue Department Fire Marshal's Office responsible for site inspections, code enforcement and permitting issues, I have worked very closely with Mr. Harbour since October of 2002 on the Logan International Airport Hold Baggage Screening Project. As the news media has reported, this was a massive construction project that would normally have taken 2-3 years to complete that was substantially completed in less than 6 months to meet a federally mandated deadline. To complicate matters even more, this project was spread out over 13-14 different jobsites, all of which were in the middle of the airside operations area of a major international airport. Needless to say this was a very fast paced project with a host of major obstacles to contend with.

Throughout my daily dealings with Mr. Harbour on this project, he has never been anything but a consummate safety professional who has never once attempted to make excuses or deny responsibility for anything that has taken place on "his project". In fact, Mr. Harbour has always quickly accepted responsibility for any issues both large and small and has always immediately taken whatever steps were necessary to correct any issues that have surfaced.

I have been dealing first hand with numerous construction companies on many major projects over the last 5 years and this is the first letter of this type that I have written. I do so without hesitation and would look forward to working with Mr. Harbour on any projects in the future here at Logan International Airport.

Please feel free to contact me directly at 617-561-3415 for any additional information.

Sincerely,

Gerald Drumm
Lieutenant/Fire Marshal's Office
Massport Fire Rescue Department
